

Moraine Park Technical College Nursing Assistant TB Skin Testing Form

You are required to initially provide documentation of either: a 2-step TB skin test OR an IGRA blood assay (QuantIFERON TB GOLD or T Spot test). Then annual TB testing while enrolled in the program.

NOTE: For a 2-step TB skin test: the first step is documentation of both the administration AND the results of the reading 48-72 hours after test administration. You need to then repeat this process for the second step, at least 7 days after first test.

- You may submit TB results you have received already. One must be within the past 12 months and then the 2nd test from the previous 12 month period, to meet the 2-step requirement.
- If your TB test or IGRA Test is positive, then a chest x-ray must be obtained & submitted.
 A TB Symptom-free Questionnaire Form also must be submitted annually.
