AMTC

ADVANCED MANUFACTURING & TECHNOLOGY CENTER

The AMTC

The Advanced Manufacturing & Technology Center is 42,000 square feet of space that can adapt to fit numerous types of educational activities and special events.

The AMTC is located on the West Bend Campus of Moraine Park Technical College, and is focused on forming partnerships in our community to develop and maintain a competitive workforce that embraces technology and innovation.

The AMTC leverages partnerships with technology manufacturers, providing state-of-the-art equipment and software that can be applied for hands-on workshops, seminars and conferences.

Your programs

The AMTC can be an ideal venue for your own programs and events. Our facility is available to local businesses, organizations and non-profits for sales meetings, planning retreats and other special events. Our seventy-five-seat auditorium is equipped with WiFi and videoconference capability, providing an affordable way for businesses to connect globally.

Planning is easy

Our meeting planners, multimedia technicians, industry experts and seasoned trainers will work with you to address every detail so that your event runs smoothly and stays within your budget.

We offer on-site catering services that can accommodate your group's specific dietary needs or special tastes.

“ The AMTC delivers affordable training options just minutes away. ”

- Craig Farrell, West Bend Area Chamber of Commerce

Close, Convenient, Comprehensive.

Our programs

Moraine Park staffs the AMTC with experienced teachers, trainers and business leaders in order to provide custom-designed training programs. We understand that many companies face unique challenges, and we're ready to design the right program to meet those needs including:

- improved productivity
- enhanced quality management
- top- and bottom-line performance impact

Partner-sponsored programs

Unique partnerships with engineering and design software companies, machine tool producers and automated equipment manufacturers allow the AMTC to provide exposure to new products through:

- new product demonstrations
- after sales training
- user group meetings and product announcements
