Ways in Which High School Students Can Earn Technical College Credit through Articulation

Articulation refers to aligning high school and postsecondary curricula to create sequences of courses offering skill attainment with unnecessary duplication. Articulation focuses on providing opportunities for high school students to take college level course work in order to get a head start on earning college credits while continuing to fulfill high school graduation requirements. If your school district is interested in articulation, check first with Tech Prep at your local technical college. If your local technical college does not offer a particular program, then you can explore an "out of district" agreement with a different technical college.

There are two types of articulation – advanced standing and transcripted credit. The table below outlines the similarities and differences between the two types. Articulation agreements are formal agreements created between public school districts and postsecondary institutions. Students benefit from both types of articulation. However, it is important to note the specific differences in benefit between advanced standing and transcripted credit.

Terminology	Advanced Standing	Transcripted Credit
DEFINITIONS	Advanced Standing may also be referred to as • "credit in escrow" because the application of the credit is delayed until students enroll in a technical college program.	 Transcripted Credit may also be referred to as: "dual credit courses" as high schools also give credit. "direct credit" because students are earning technical college credit directly from the technical college.
RELATIONSHIP BETWEEN HIGH SCHOOL AND TECHNICAL COLLEGE COURSES	High school course(s) or competencies are determined to be equivalent or comparable to a technical college course. Agreements require a minimum of a 3.0 grade point on a 4.0 scale for students to earn credit. High school grading policies and standards are followed.	Technical college curriculum is taught to high school students. A variety of delivery methods may be used. Students earn both high school credit and technical college credit simultaneously. Technical college grading policies and standards established in the agreement are followed.
TEACHER	Course is taught by a high school teacher who holds a current DPI license in the related area of instruction.	Course is taught by a WTCS certified technical college instructor or a high school instructor who holds a current DPI license in a related area and has been granted WTCS articulation certification under Wisconsin Administrative Code TCS 3.03(9)(b).
AWARDING CREDIT	The student must meet all conditions of the articulation agreement in order to be eligible for advanced standing credit. Technical college credits are awarded; however, technical college grades are not given for these courses.	Upon successful completion of course, grades are posted to an official technical college transcript and tabulated in the student's technical college GPA. Students earn technical college credit and high school credit simultaneously.

Note: Transcripted credit courses that are part of an articulation agreement are one avenue through which high school students may enroll in technical college courses. Other options that allow high school students to attend technical colleges are:

- Youth Options High school juniors and seniors who meet certain requirements are able to enroll in courses at a technical college for both high school and technical college credit.
- Two-Year Youth Apprenticeship Programs –Some Youth Apprenticeship programs include transcripted credit courses. (Others may include advanced standing courses.)
- 38.14(3) Contracted Services Sec. 38.14(3), stat., enables technical colleges to contract with school districts to provide a wide variety of educational services.
