

What is the ACCUPLACER Next Generation?

ACCUPLACER Next Gen is a computer generated assessment. It was developed to help insure that students entering college can progress toward achieving their educational goals.

ACCUPLACER Next Gen is a tool that will identify your academic readiness in reading, writing, and math. It is used to determine the courses you will need to take first as you begin your college studies.

ACCUPLACER Next Gen is administered on a personal computer. You will read the instructions and questions on the computer monitor and will select your answers using the computer keyboard or mouse.

After completing ACCUPLACER Next Gen, you will be informed about your results by an advisor and about the next necessary steps to take as you prepare to enter your program.

The fee to complete the ACCUPLACER Next Gen is \$15.00. You must register for the ACCUPLACER by calling 1-800-472-4554 or register and pay in-person with any Student Services Representative at any of the three campuses.

What kinds of questions are on the ACCUPLACER?

Reading

This test is designed to measure how well you understand what you read. It contains 20 questions. Some are of the sentence relationship type in which you must choose how sentences are related. Other questions refer to reading passages of varying lengths.

Writing

Two kinds of questions are given in this test. Sentence correction questions ask you to choose a word or a phrase to substitute for an underlined portion of a sentence. Construction shift questions ask that a sentence be rewritten in a specific way without changing the meaning. A broad variety of topics are included here. You will be presented a total of 25 questions.

Arithmetic

The arithmetic test measures your skills in three primary categories. The first is operations with whole numbers and fractions. This includes: addition, subtraction, multiplication, division of whole numbers and fractions as well as recognizing equivalent fractions and mixed numbers. The second category involves operations with decimals and percent. It includes: addition, subtraction, multiplication, and division of decimal numbers as well as percent problems, decimal recognition, fraction and percent equivalences, and estimation problems. The last category tests applications and problem solving. Questions include: rate, percent, and measurement problems, geometry problems, and distribution of a quantity into its fractional parts. A total of 20 questions are asked.

Quantitative Reasoning, Algebra, and Statistics (QAS)

The QAS test targets students who are entering non-STEM fields of study or who are undecided on a major. Questions focus on the following knowledge and skill categories: rational numbers, ratio & proportional relationships, exponents, algebraic expressions, linear equations, linear applications & graphs, probability sets, descriptive statistics and geometry concepts. This area consists of 20 questions.

Assistance with studying for the ACCUPLACER is available on each Moraine Park Technical College campus by calling the Student Success Center at 920-924-6393.

Testing accommodations will be made for students with disabilities.

If you have a disability, you may request a special administration of the ACCUPLACER by calling 1-800-472-4554 and asking to talk to an Accommodation Specialist.
