

We train the workers you need!

FACT Purpose:

The Moraine Park Foundation created the FACT Initiative to entice students to enroll full-time in manufacturing programs, as well as empower them to complete their degree by offering scholarships.

FACT Goals:

- Provide area businesses with direct access to manufacturing program students
- Expedite the time from degree to workforce
- Strengthen the appeal of manufacturing-related careers
- Grow enrollment in manufacturing-related programs
- Unite manufacturers, educators and students

FACT Focus Areas:

Recruitment:

In an effort to help make education affordable and increase enrollment in manufacturing-related programs, new students who enroll full-time in a qualifying manufacturing program are eligible for a FACT scholarship.

Retention:

We know that one of the main reasons students leave prior to graduation is lack of financial resources. A FACT scholarship removes financial roadblocks and helps ensure students complete their degrees.

We also know that retention increases as students interact with manufacturers. The FACT program provides manufacturers with an opportunity to showcase their companies to Moraine Park students.

Recognition:

FACT partner logos are highlighted on large format posters in our manufacturing labs on all three campuses to encourage students to give priority to FACT partners when seeking employment.

FACT Benefits:

Benefits to FACT Partners:

- Provides direct access to high-quality manufacturing students
- Strengthens the pool of ready-to-work, skilled candidates to fill open positions
- Reduces costs of on-the-job training
- Increases brand recognition through lab and classroom posters

Benefits to Moraine Park Students:

- Scholarships make education accessible and affordable
- Networking opportunity provides direct access to employers

FACT Partner Benefits

Partner-\$7,500

Recruitment Opportunities

- Opportunity to meet with students at annual donor appreciation luncheon
